

## LOCKER BASICS

Everyone is assigned a locker in their team area. Some students are assigned a locker partner, but not very many. Girls are randomly assigned to girls. Boys randomly assigned to boys.

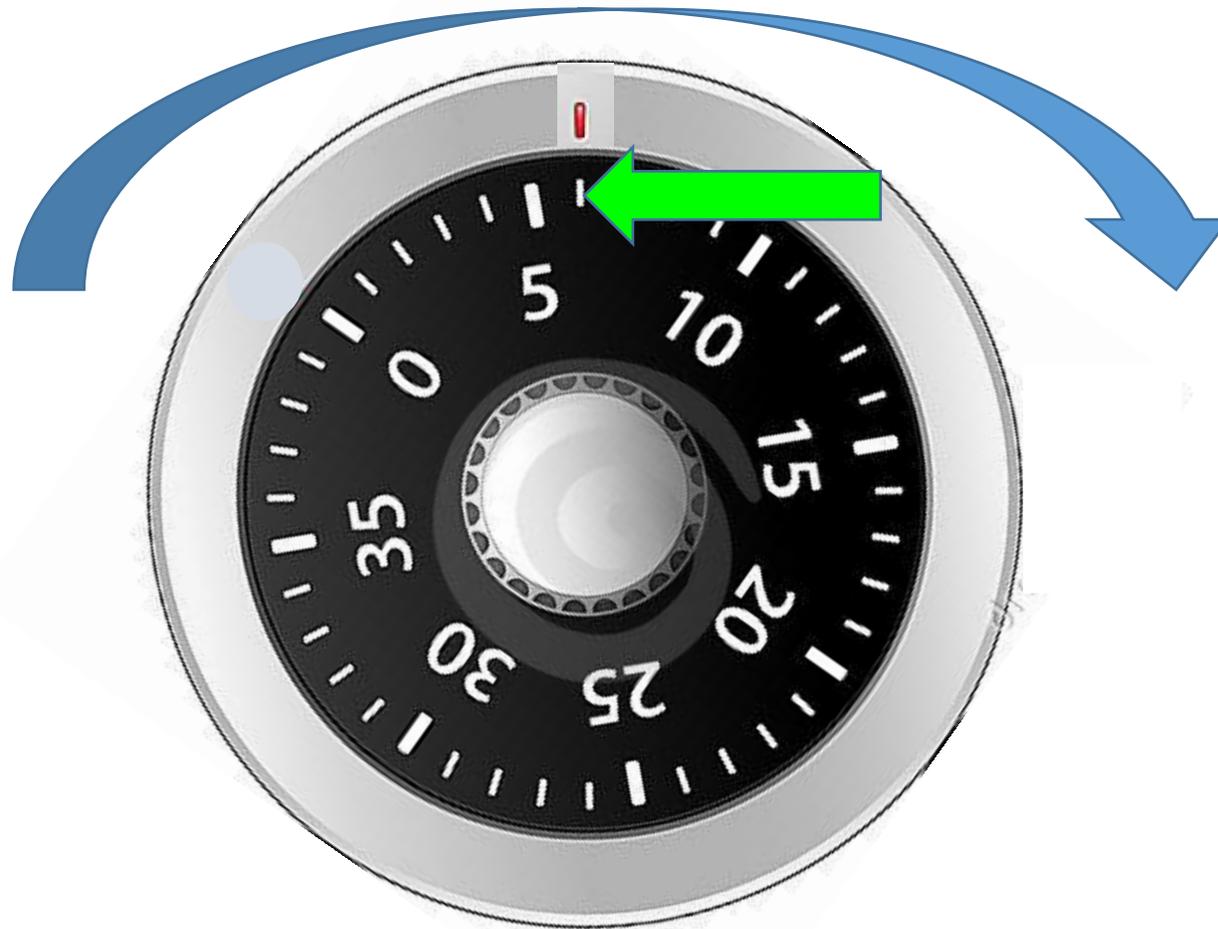

Each line on the dial equals ONE. The arrow in the picture is pointing to the number 3.

Step One: Always begin by starting the dial on number 0.

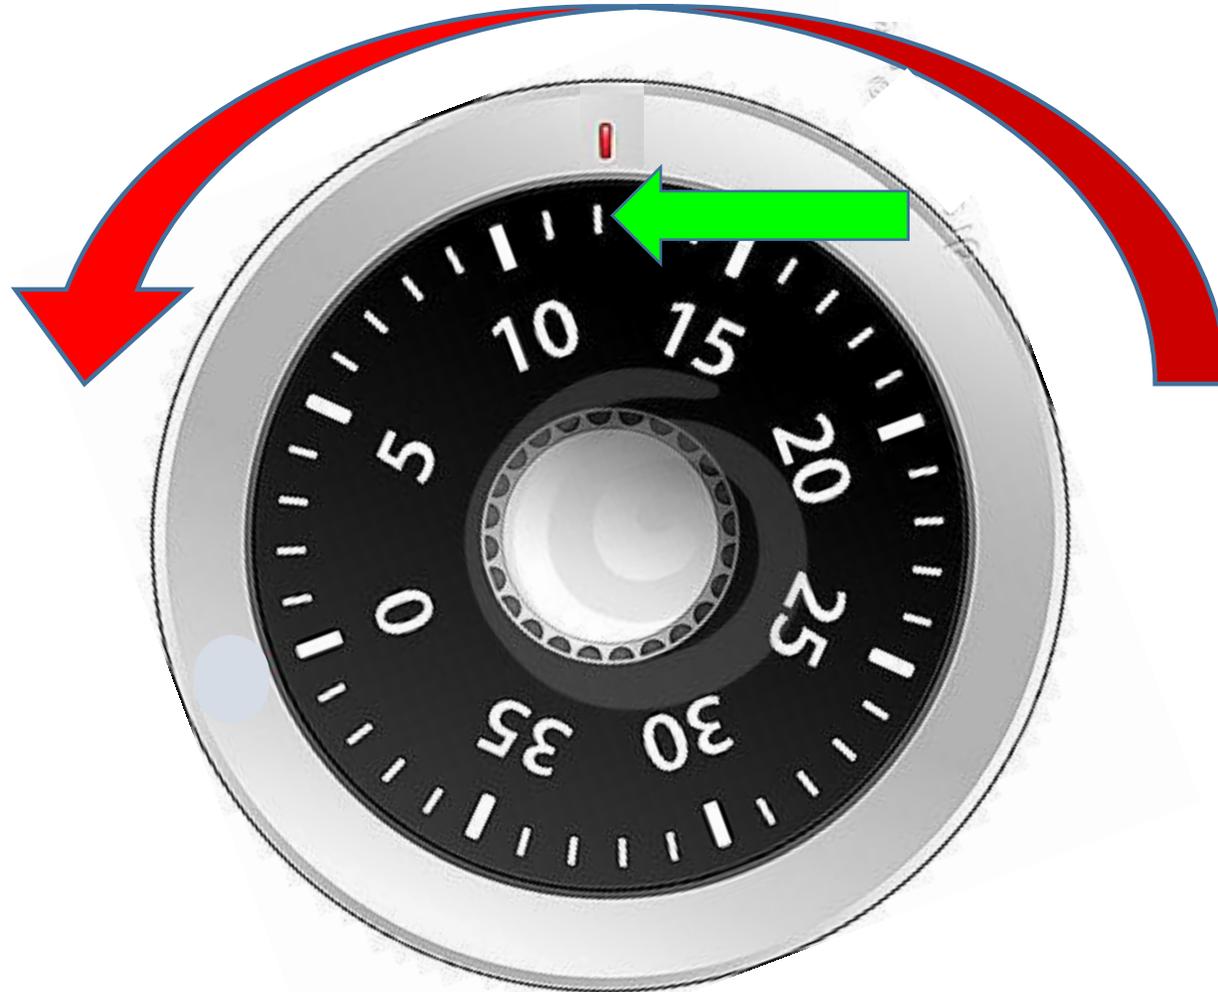

**Step Two:** Turning the dial RIGHT (or clockwise>>), stop at the first number of your combination, or the line that equals the first number of your combination. In this example the line equals the number 6.

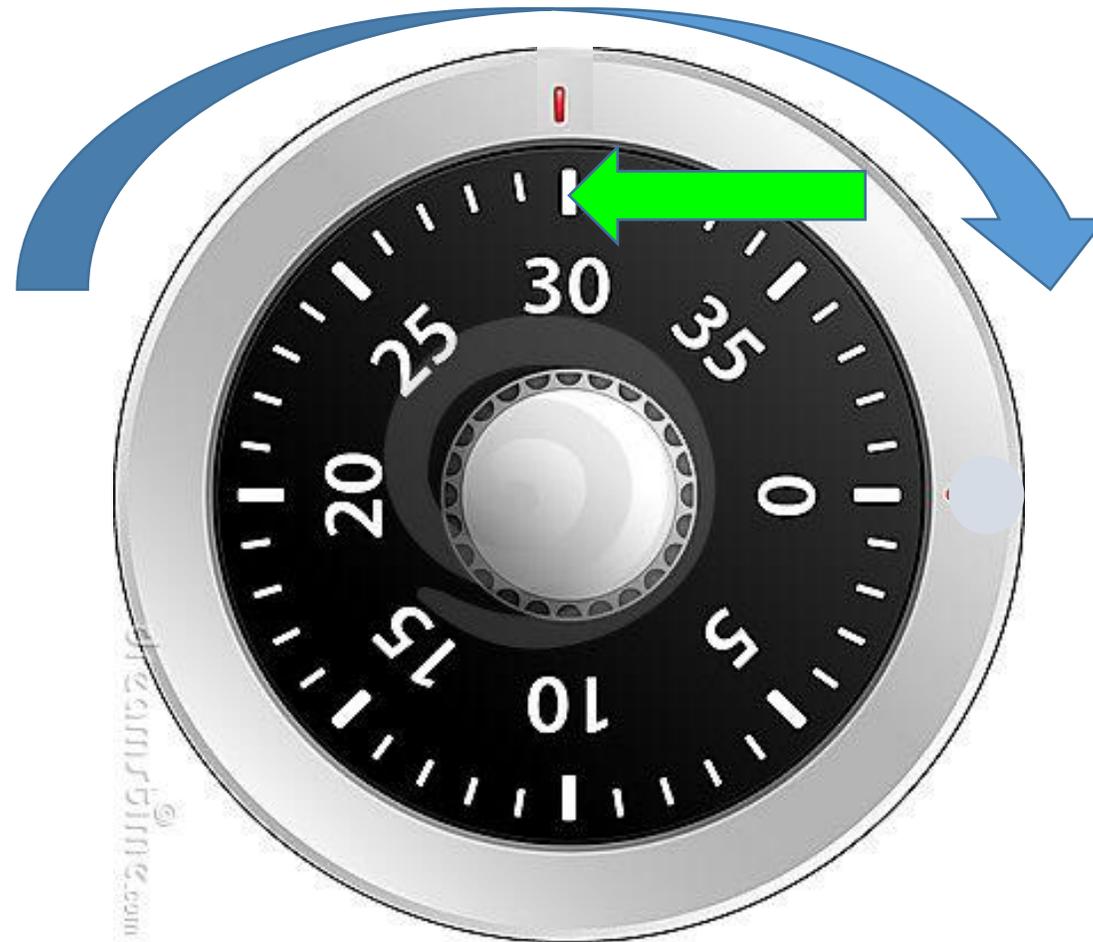

**Step Three:** Now, turn the dial LEFT (<< or counter clock-wise). GO PAST the second number on your combination the first time it arrives at the top. Do NOT stop! It is important to keep the dial moving.

Keeping turning LEFT until you arrive on the second number a second time. Now stop. The picture shows # 12.

**Step Four:** Turn the dial RIGHT (or clockwise>>) one last time. Stop immediately at the third number of your combination, or the line that equals the third number of your combination. In this example the number is 30.

**Step Five:** Lift UP on the lever as you PULL the door towards you.

**Step Six:** Close the locker door when you are finished gathering your materials.

**Step Seven:** Turn the dial back and forth a few times once it is closed for security.
